SmartBand™
BY BANDALL

Octopus Ace
Octopus One

Weigh, print, and band in one flow. Every product. Its own data.

Smart banding with integrated data

Bandall SmartBand™ integrates weighing, data processing and variable printing directly into the banding process. The band carries real-time product data, applied exactly when needed.

↑
Print live product data
on the band

↑
Connect to weighing and
ERP systems

Built for multiple applications

Food processing

Weigh, Price, and Band in One Step

Each product is:

- Weighed
- Priced
- Printed
- Banded

SmartBand™ ensures accurate weight and pricing, reduces handling and performs reliably in demanding environments. Perfect for meat, fish and fresh products.

Industrial laundry

Variable Data Printing and Identification

Add to every band:

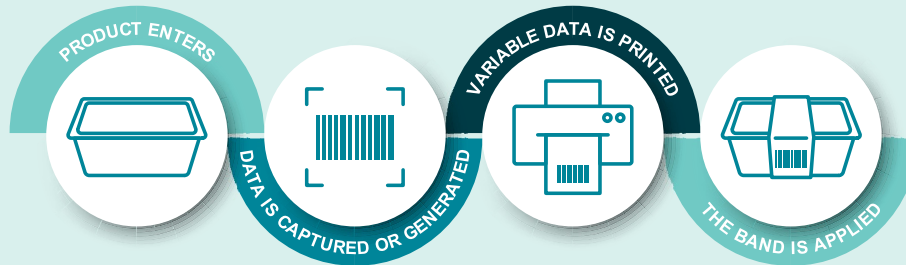

- Barcodes
- Batch and lot information
- Serial numbers
- ERP-driven content

Each item is matched with
the exact data it requires,
in real-time.

Simplify your packaging process

SmartBand™ brings weighing, printing and labeling together into one single, continuous process.

Less complexity Remove labels entirely

By combining multiple steps, SmartBand™ improves control across your operation.

Reduce handling: Combine weighing, data processing, printing and banding in one flow.

Minimize errors: Apply accurate real-time data during packaging with consistent positioning.

Increase efficiency: Simplify your line and combine branding, bundling and data.

Enable identification and personalization: Assign unique data to every product or bundle.

Built for performance

SmartBand™ is designed for demanding industrial environments.

- Fully aligned with Bandall technology
- Consistent print quality
- High throughput performance
- Compatible with existing production lines
